June 2026 Edition

Zoom Interactions Space with Richie Parker.

Richie Parker

On **26th June 2026**, we held a Zoom meeting with **Richie Parker**, a mechanical engineer from Virginia, USA. He shared his inspiring story about his childhood and his journey to success, explaining how he overcame the challenges he encountered along the way. He also answered various questions from participants. **"In all challenges, there's always a way,"** Richie emphasized. Addressing community stereotypes, Richie encouraged our children to surround themselves with people who celebrate, support, and believe in them as part of their inner circle.

Children voting their leaders

On **26th June 2026**, our learners exercised their democratic right by voting for their respective leaders. Our school demonstrated transparency and fairness throughout the elections. Prior to the polls, candidates conducted lively and engaging campaigns, presenting their ideas and seeking the support of their fellow learners.

A Word From One of Our Interns.

I'm Grace Nabwami, pursuing a degree in Special Needs Education at Africa Renewal University. Working with learners with special needs at KSPH has inspired me, and watching our unit perform at assembly reminds me that patience and inclusion transform lives. Every small achievement has taught me resilience, empathy, and the importance of believing in every learner.
